

Georgian Fireproof Cable Tray Price

AI Overview

Fire-resistant cable trays in Georgia typically range from \$10 to \$25 per meter, depending on material, type, and load capacity.

Price Overview

The cost of fire-resistant cable trays varies based on material, design, and size. Common materials include galvanized steel, stainless steel, aluminum, and fiberglass composites, with galvanized steel being the most cost-effective and stainless steel or fiberglass offering higher fire and corrosion resistance. Ladder-type trays, which support heavier cables, are generally more expensive than perforated or wire mesh trays.

- Galvanized steel trays: \$10–\$15 per meter
 - Stainless steel trays: \$20–\$25 per meter
 - Aluminum trays: \$15–\$22 per meter
 - Fiberglass (FRP/GRP) trays: \$18–\$25 per meter
- Cable tray fittings, such as elbows, tees, and brackets, are priced per piece, typically ranging from \$5 to \$50 depending on size and material.

Factors Affecting Price

- Material and Fire Resistance: Fire-resistant coatings or inherently fireproof materials increase cost. Fiberglass and stainless steel are preferred for high-temperature environments.
- Tray Type: Ladder trays are more expensive than perforated or solid trays due to higher load capacity
