

High-Density Installation Solution for Intelligent Cold Aisles in Myanmar

Overview

Beyond a simple separation of flows via the creation of dedicated aisles, cold aisle containment allows for the containment of aisles for optimized cooling. Hot and cold air are separated from the definition of the room through the use of roofs, panels and doors (at the entrance and). How Litech's Cold Aisle Containment System Revolutionizes Efficiency Litech's Cold Aisle Containment System is specifically designed to optimize airflow management and dramatically reduce energy consumption in modern data centers. With constant cooling required all year round, managing your cooling efficiency can lead to significant savings. Warranty: This Vertiv™ product is warranted to be free of defects in. Ardmac have developed a range of Ground Supported (GS) and Ceiling Supported (CS) assemblies catering to an array of different modular clean rooms and off-site construction industry requirements including data centre design and data centre construction. Aisle containment creates an even and consistent supply intake temperature for data center equipment and electronics.
