

High-quality long-span cable trays

AI Overview

Long-span cable trays are engineered for heavy-duty, industrial cable support with high load capacity, corrosion resistance, and durability for indoor and outdoor applications.

Overview

Long-span cable trays are designed to support heavier cables over larger spans than standard trays, making them ideal for industrial, mining, petrochemical, and infrastructure projects . They provide a robust structural solution for overhead, underground, and outdoor cable installations, ensuring safety, reliability, and ease of maintenance.

Types and Materials

- Ladder Type: Offers maximum ventilation and easy cable installation; widely used in oil, gas, and renewable energy sectors .
 - Channel Type: Suitable for medium loads and compact installations.
 - Perforated Type: Provides good airflow and heat dissipation, reducing the risk of short circuits . Materials commonly used include:
 - Stainless Steel (304/316): Excellent corrosion resistance and durability.
 - Aluminum Alloy: Lightweight and resistant to corrosion.
 - FRP (Fiberglass Reinforced Plastic): High strength, heat resistance, and suitable for harsh environments .
- Finishes: Pre-galvanized, hot-dipped galvanized, and powder-coated surfaces enhance corrosion resistance and longevity....
