

How are electrical distribution boxes sold on construction sites

AI Overview

Electrical distribution boxes on construction sites are typically sold or rented as portable, pre-wired units designed for safety, flexibility, and harsh outdoor conditions.

Types and Features

Construction site distribution boxes, also called temporary power boxes or portable distribution cabinets, come in various types depending on site size and power requirements. Common types include:

- Connection cabinets: Connect to the public supply grid and measure energy consumption.
- Main and group distributors: Distribute power to multiple downstream boxes.
- Terminal or final distribution cabinets: Provide power to specific equipment or machinery .

These boxes are designed for durability and safety, often featuring:

- IP55 to IP67 protection against dust and water ingress .
- Impact-resistant housings made of sheet steel, thermoplastic, or fiberglass .
- Circuit protection including main breakers, fuses, and earth leakage protection .
- Clear labeling and grounding for safe operation .
