

# How many AI servers are shipped in China

## Overview

Forecasts indicate the global AI server market in 2023 was about US\$21.1 billion, with shipments exceeding 1 million. What is China's largest AI server company?

Inspur Electronic Information (SZ: 000977) is China's largest server manufacturer with 30%+ domestic AI server. In 2023, the shipment volume of AI servers in China amounted to 1.1 million. Log in or register to access precise data. Slightly more than half of these servers were for general computing, whereas the rest were designated for training artificial intelligence models. In 2023, international developments and economic factors. China is pouring billions into AI research, outpacing many of its rivals in funding, talent, and sheer ambition. But can it turn investment into innovation?

Now, as the capabilities of hardware and algorithms improve, AI slowly advances into the domain of human abilities while taking on. According to data from an IDC report reviewed by Reuters, Chinese producers of graphics processing units and artificial intelligence chips secured close to 41% of their nation's market for AI accelerator servers last year.
