

How many lights are on the fiber optic router

AI Overview

Most fiber optic routers have between 6 and 9 indicator lights, each representing a specific function or status.

Common LED Indicators

Fiber optic routers usually feature 6 to 9 LEDs, though the exact number can vary by model and manufacturer . The most common lights include:

- Power: Indicates whether the router is receiving power. Solid light means the router is on, while off indicates no power .
- PON (Passive Optical Network): Shows the status of the optical connection. Solid light indicates normal operation, blinking may indicate signal issues .
- LOS (Loss of Signal): Alerts to fiber disconnection or signal loss. Normally off; red or blinking indicates a problem .
- LAN: Represents wired connections to devices. Flickering shows active data transfer .
- WLAN / Wi-Fi: Indicates wireless network activity. Flickering shows data transmission, off means Wi-Fi is disabled .
- WPS: Used for secure wireless setup with compatible devices .
- SYS / Status: Reports router health or errors. Flashing usually indicates normal operation, off may indicate a fault .
- Additional LAN ports: Some routers have multiple LAN indicators for each port
