

How much does 48-core fiber optic cable cost per kilometer

AI Overview

The cost of a 48-core ASS fiber optic cable per kilometer typically ranges from \$26,000 to \$65,000, depending on installation complexity and cable specifications.

Material Costs

The raw cable itself can vary widely based on fiber type and construction. For a 48-core multimode or single-mode cable, wholesale prices generally range from \$1,000 to \$3,000 per kilometer for the cable alone, with armored or outdoor-rated cables costing more due to protective layers and environmental resistance. Higher strand counts and specialized construction (e.g., loose tube, armored) increase the material cost proportionally.

Installation Costs

Installation is a major component of the total cost. Factors include:

- Trenching vs. aerial installation: Underground trenching is more expensive than aerial deployment on poles.
- Urban vs. suburban terrain: Dense urban areas with curb restoration, duct banks, and traffic management can push costs to \$65,000 per km or more, while simpler suburban installations may cost around \$26,700 per km.
- Labor and permits: Night work, complex right-of-way access, and multiple agency approvals increase costs
