

How much does a C300 optical module cost

AI Overview

The cost of a C300 optical module is approximately USD 6,500, depending on vendor and specifications.

C300 optical modules, such as the ZTE GPON SFP modules compatible with OLT C300/C320 systems, are priced around USD 6,500 for standard high-speed transceiver models suitable for long-distance transmission (20km–120km) and high-bandwidth applications . Prices may vary depending on the module class (C+, B+, or C++), vendor, and shipping options. For example, modules listed on eBay or Amazon may have different pricing due to seller markup, VAT, or regional availability .

Factors Affecting Price

- **Module Class:** C+, B+, and C++ modules differ in transmitted optical power and distance capabilities, which can influence cost .
- **Vendor and Region:** Direct suppliers from China or manufacturers like ZXA10 may offer bulk pricing or OEM/ODM options, while retail platforms like Amazon or eBay may include additional fees .
- **Warranty and Support:** Modules with a one-year warranty or professional support may cost more, but provide added reliability .
- **Delivery and Shipping:** International shipping, customs, and VAT can affect the final purchase price, especially for European or North American buyers .
