

How much does a pigtail box cost

AI Overview

Pigtail boxes typically range from \$10 to \$50 per unit for standard models, with prices varying based on type, capacity, and features.

Price Overview

The cost of a pigtail box depends on its type, capacity, and intended use. Basic indoor wall-mounted fiber optic pigtail boxes for small installations can start around \$10-\$20 per unit, while more robust outdoor or high-density models suitable for enterprise networks or telecom hubs can range from \$30-\$50 or more per unit. Bulk orders or OEM/ODM customization may reduce the per-unit cost when purchased directly from manufacturers.

Factors Affecting Price

- **Material and Durability:** Boxes made from HDPE, fiberglass-reinforced composites, or with waterproof, dustproof, and UV-resistant housing are more expensive due to enhanced protection and longevity.
- **Capacity and Configuration:** Models with multiple compartments, higher fiber density, or integrated splitters cost more than simple single-layer designs.
- **Installation Type:** Wall-mounted, rack-mounted, or pole-mounted boxes have different pricing based on mounting hardware and structural design.
- **Accessories and Features:** Kits including pigtail cables, SC/LC couplers, color-coded strands, and protective ferrules may increase the price but provide convenience and reduce installation time
