

How much does an optical fiber fusion splice cost

AI Overview

Fusion splicing services typically cost \$50–\$150 per splice, while fusion splicer machines range from a few hundred to several thousand dollars depending on type and features.

Fusion Splicing Service Costs

The cost of fiber optic fusion splicing varies based on project size, fiber type, and site conditions. For most commercial projects, expect \$50–\$150 per fusion splice point, which usually includes labor and OTDR verification of each joint but excludes materials like closures or trays and project management fees (Splicelist.com) . Factors affecting service costs include:

- Fiber count: Larger projects with high fiber counts often reduce the per-splice rate due to volume pricing. For example, a 24-fiber job may cost \$100 per splice, while a 288-fiber project could drop to \$55 per splice.
- Site conditions: Aerial splicing in open areas is cheaper than underground vault work requiring traffic control or confined space entry.
- Testing and documentation: OTDR testing may be included or billed separately at \$75–\$150/hour. Formal trace reports may incur additional charges. For small projects (
