

How to check the brand and model of a distribution box

AI Overview

You can identify the brand and model of a distribution box by inspecting the panel's exterior and interior labels, breaker markings, and manufacturer stickers.

Step 1: Locate the Distribution Box

Distribution boxes are usually installed in basements, garages, utility rooms, closets, or exterior walls of a building. In apartments or condos, they may be in laundry rooms or closets .

Step 2: Inspect the Front Cover

- Look for a logo or printed brand name on the front cover. Common brands include Square D, Siemens, Eaton (Cutler-Hammer), GE, Federal Pacific Electric (FPE), or Pushmatic .
- Some panels may have a metal or plastic emblem instead of printed text .

Step 3: Open the Panel Safely

- If the brand is not visible externally, carefully open the panel door. Do not touch any wires or live components.
- Look for a manufacturer's label or sticker inside the door or on the side wall of the panel. This label usually contains the brand, model number, electrical specifications, and installation standards
