

How to connect a fiber optic switch to power

AI Overview

Fiber optic switches require a separate power source, either via direct AC/DC connection or through a PoE media converter, as fiber cables alone cannot carry electrical power.

Direct AC/DC Power Connection

Most fiber optic switches have a built-in power input for AC or DC supply. To connect power:

- Locate the power port on the switch, usually labeled AC IN or DC IN.
- Use the supplied power adapter or cable compatible with the switch's voltage and current rating.
- Plug the adapter into a grounded AC outlet or connect to a DC power source if supported.
- Verify the switch powers on by checking the LED indicators for system status and link activity .

Using PoE Media Converters

If the switch is installed in a location without direct AC access, you can use a PoE media converter:

- Connect the fiber optic cable from your core network to the media converter's fiber port.
- Connect an Ethernet cable from the converter's RJ-45 port to the fiber switch's Eth...
