

How to connect an electrical wire from a distribution box

AI Overview

To connect an electrical wire from a distribution box, ensure the main power is off, identify the input and output terminals, and securely connect phase, neutral, and earth wires to the appropriate breakers and links.

Step-by-Step Guide

1. Safety First Always turn off the main power supply before starting any work to prevent electrical shock. Use insulated tools and wear protective gloves if possible .
2. Prepare the Distribution Box Mount the distribution box securely on a wall at an accessible height. Ensure the installation site is free of obstructions . Identify the main input terminals for phase (live) and neutral wires, as well as the earth link.
3. Connect the Main Supply

- Connect the incoming phase wire (usually brown or red) to the main MCB or main switch input .
- Connect the neutral wire to the neutral link or the input of the RCCB if used .
- Connect the earth wire to the earth link, which may be connected to an earth pit or the metallic body of the panel .
- 4. Install Circuit Breakers
 - Place the MCBs (single-pole for individual loads, double-pole for special loads) in their designated slots .
 - Connect the output of the main MCB to the input of the RCCB if present. Then connect the output of the RCCB to the input of the load MCBs .
- 5. Connect Outgoing Wires...
