

How to connect wires from a home electrical distribution box

AI Overview

To safely connect wires in a home distribution box, first turn off the main power, then connect the incoming live, neutral, and earth wires to the main terminals, followed by connecting circuit breakers, neutral link, and earth link according to the wiring diagram.

Step-by-Step Wiring Process

1. Safety First Always ensure the main power supply is completely turned off before starting any work to prevent electric shock. Use insulated tools and wear protective gear . 2. Mount the Distribution Box Secure the distribution box to a wall at an accessible height, ensuring the installation site is free of obstructions . 3. Connect the Incoming Supply

- Identify the incoming live (phase) wire (usually brown or red) and connect it to the main terminal or main MCB.
- Connect the neutral wire to the neutral bus bar.
- Connect the earth wire to the earth bus bar . 4. Install Circuit Breakers
- Place the main MCB in the designated slot.
- Install single-pole or double-pole MCBs for branch circuits according to your load requirements.
- If using an RCCB, connect the output of the main MCB to the input of the RCCB . 5. Connect Branch Circuits
- Connect the phase wire from the output of the RCCB (or main MCB if no RCCB) to...
