

How to cut notches in cable trays

Overview

The bends, tees, crosses, risers and reducers of wire mesh cable tray can be easily and quickly made live at the project by using a bolt cutter. Since the jaws of the bolt cutter drags a layer of zinc across the cut end and forms a protective layer.

Measuring and marking: Accurate measurement and marking techniques for cable trays. Oglaend System manufacture and deliver Multidiscipline modular bolted support systems, cable trays, cable ladders and accessories for complete installation and containment of Instrument, Electrical, Telecom, HVAC and Piping. In the Oglaend System Cutting Guideline you can easily find out what the optimal cutting lengths/intervals are for all modular products. As well as, learn about what's important to consider before you start cutting, what tools we recommend and after treatment of products. Following the advice given. Properly cutting a cable tray ensures the integrity of the system, safety, and compliance with electrical codes. QUAXLENT. Use this guide to learn the most effective installation practices when installing Cablofil tray.
