

How to ground a household electrical distribution box in Bahrain

Overview

Connect one end of the insulated copper wire to the grounding grid and lead the other end into the distribution box and connect it to the ground bus bar of the distribution box. Fix the ground wire firmly with fasteners such as screws, nuts, and washers. **Test the grounding. The EWA has adopted many of the clauses from the latest editions of the IEC, IEE & KUWAIT Regulations, modifying them to suit Bahrain conditions where necessary. It is the intention of the EWA to re- examine these Regulations periodically and to issue amendment sheets whenever it is considered. This document presents a revised edition of the Regulations for Electrical Installations, superseding the 1985 version. EWA's Standards and Regulations provide comprehensive guidelines and requirements to ensure safe, efficient, and reliable.
