

How to ground cables in a distribution box

Overview

Attach a ground wire from one of the threaded studs (A) at the bottom of the housing, to the mounting plate (B). The ground resistance between all system parts shall be $< 1 \Omega$. Power from factory ground must be installed by a qualified electrician. Each DISTRIBUTION BOX and controller must be grounded. 26 mm² (10 AWG) ground wire must be used, and in all other markets a 6 mm² must be used. This part is covered by National Electrical Code article 250. A subpanel helps distribute electricity throughout your home, but to enjoy this advantage, you must ground it first for safety. Refer to the publication for each specific I/O module or block for individual conductor-category classification of each I/O line. ac power lines for power supplies and I/O circuits. high-power digital dc I/O lines — to.
