

How to install a lightweight partition wall distribution box

AI Overview

Installing a distribution box on a lightweight partition wall requires careful wall preparation, precise panel installation, and safe electrical mounting with proper wiring and grounding.

Step 1: Prepare the Partition Wall

- **Base Treatment:** Clean and level the floor, ceiling, and wall base to ensure a flat installation surface for the panels .
- **Panel Cutting:** Measure and cut the lightweight partition panels (e.g., ALC boards) to fit the wall dimensions, leaving expansion gaps for thermal movement .
- **Positioning:** Hoist and place each panel in its designated location, checking verticality and alignment .
- **Connection and Reinforcement:** Secure panels with U-shaped cards, expansion bolts, or special connectors, and fill gaps with mortar or foaming agents .
- **Sealing:** Complete the wall by sealing joints, corners, and interfaces with doors, windows, or beams .

Step 2: Select and Prepare the Distribution Box

- **Choose the Right Box:** Select a distribution box suitable for indoor use, load capacity, and IP/NEMA rating .
- **Tools and Materials:** Prepare screwdrivers, wire strippers, electric drill, multimeter, insulation tester, expansion bolts, fixing brackets, terminal blocks, wires, cable ties,...
