

How to install the fiber optic cable protection box

Overview

Position the keyhole on back of box over screws and tighten against wall (Fig. Box Assembly with Cable Stub Place cable coil near mounting location. Leave enough cable slack to. A fiber termination box is the standard instrument used in fiber optic networks to connect, secure, and protect optical fibers at the terminating point. It functions as a junction between the incoming fiber cable and the outgoing customer-side fiber cable, where one fiber can be spliced, patched. The following steps provide a detailed installation guide for fiber termination boxes: Before starting the installation, you will need the following tools and materials: Fiber termination box: Select a fiber termination box that meets your requirements and specifications. Warning: Wear safety glasses to prevent accidental eye injury. The 1U fiber optic distribution box is used as an example to introduce its structure.
