A person engaged in installing, repairing, or maintaining a pump for a well if the activity only involves installing or modifying a conductor going from the pump's junction, pull, or device box to the nearest disconnecting. Junction boxes protect electrical wires from damage, prevent shocks, and stop sparks from igniting flammable material nearby. To install one, you'll need to strip the ends off all the wires that will be in the box. To complete the electrical circuit, tie together the same-colored wires and hold. This includes a 220V well pump, wire connectors, a junction box, a circuit breaker, conduit, and a waterproof cover. Double-check that you have the correct size and type of wire for your pump.
