

How to locate the optical cable line route

Overview

Fiber optics are harder to find. They don't carry electricity, so special tools like ground-penetrating radar (GPR) are needed to locate them. Whether it's a small fence or a big construction job, knowing where underground utilities are saves. Fiber optic cables are composed of thin strands of glass or plastic fibers that transmit data using light signals. They are preferred over traditional copper cables due to their higher bandwidth and faster speeds. We're one of Southern California's most trusted damage prevention companies. Physical Search If you are searching for fiber routes in your. The latest Pathfinder Pipe Cable locator based on SAF technology is designed to provide the operators a cable route tracer that can be utilized for cable & pipe locating in the most congested utility environment for long distance tracing of pipe or cables.
