

How to make fiber optic patch cords in a factory

Overview

Explore the complete manufacturing and testing process of fiber optic patch cords, including polishing, assembly, and IL/RL testing. Discover how Gcabling ensures consistent quality for high-performance connectivity. Behind every stable insertion loss value, every clean endface, and every reliable connection is a long chain of precise processes, specialized equipment, and strict quality control. Their performance directly impacts signal quality, insertion loss (IL), and return loss (RL). We have organized the following mind map according to the tools and. Our Fiber Optic Patch Cord Production Line equipment includes everything needed to manufacture high-quality patch cables and pigtails: from cable making machines and pneumatic crimpers to precision polishing fixtures and IL/RL test stations.
