

How to route the wiring for the lighting fixture

AI Overview

To route wiring for a lighting fixture, turn off power, plan the wire path from the power source to the fixture and switch, and connect wires according to color codes while ensuring proper grounding and secure connections.

Safety First

Before starting, turn off the circuit breaker controlling the area where you'll work and verify the power is off using a voltage tester. Wear insulated gloves and safety glasses, and use insulated tools to prevent electrical shocks .

Planning the Wiring Path

- Identify the power source: This could be an existing ceiling box, wall outlet, or breaker panel .
- Determine the fixture location: Mark where the new light will be installed and where the switch will be placed.
- Route the cable: Fish the electrical cable through the ceiling joists or wall studs from the power source to the fixture and then to the switch. Use a /2 cable for simple circuits or /3 cable if a three-way switch is needed .
- Secure the wires: Use staples or cable clips to keep wires in place, avoiding sharp bends or tension.

Connecting the Wires

- Match wire colors: Connect black (hot) to black, white (neutral) to white, and gree...
