

How to use an Ethernet to fiber optic communication module

Overview

First, you need to plug an SFP module into the SFP slot on the media converter, plug another module into the switch, and then connect the converter to the PoE switch with the fiber optic cable. Use the Ethernet cable to connect the IP camera and the media converter. In today's network environments, fiber media converters are essential for seamlessly integrating optical fiber and copper cabling, extending network reach, and enhancing transmission stability. Depending on the device and cable, they bridge distances of up to 80 km at data rates of up to 1 Gbps. 5 Gbps workbox and bundles it with a set of application specific SFP modules to create a simple, easy to order LAN to Fiber Converter solution for your specific application. The TKIT-ETH 10/100/1000BASE-T.
