

How to view Huijue optical module information

AI Overview

You can view Huijue optical module information on Huawei switches using the display transceiver command, which provides details such as module type, wavelength, vendor, transmission distance, and DDM parameters.

How to Query Optical Module Information

- Basic Module Information
- Use the command: `display transceiver interface` This displays the optical module type, connector type, wavelength (nm), transfer distance (m), vendor name, serial number, and manufacturing date .
- Example output may include:
- Transceiver Type: 1000_BASE_LX_SFP
- Connector Type: LC
- Wavelength: 1310 nm
- Transfer Distance: 10,000 m
- Vendor Name: HG GENUINE
- Serial Number: MA09140180968
- Manufacturing Date: 2009-04-09 .
- Detailed Diagnostic Information (DDM)
- To view real-time operational parameters such as temperature, voltage, and bias current, use the verbose option: `display transceiver interface verbose` This provides Digital Diagnostic Monitoring (DDM) data, which helps monitor module health and troubleshoot link issues
