

# Inquiry about integrated APC data center modules in Canada

## AI Overview

APC integrated data center modules in Canada offer prefabricated, scalable, and rapidly deployable solutions combining power, cooling, racks, and management systems.

### Overview

APC, through its Trade-UPS and integrated rack programs, provides prefabricated and assemble-to-order data center modules designed for rapid deployment and predictable performance in Canada . These modules are factory-built to precise specifications, preconfigured with UPS, cooling, racks, and management software, and delivered partially assembled to the site, significantly reducing installation time and costs . They are suitable for high-density IT environments, including hyperscale, cloud, AI, and industrial applications.

### Key Features

- **Scalability and Flexibility:** Modules support up to 40+ high-density racks per pod with hybrid liquid-air cooling, allowing expansion as IT demands grow .
- **Integrated Infrastructure:** Combines power, cooling, racks, and management software in a single, secure, weatherproof structure .
- **Rapid Deployment:** Factory-tested and preassembled, enabling faster time-to-market compared to traditional builds .
- **Reliability and Predictability:** Use of DCIM software ensures improved operational...
