

Installation cost of trapezoidal cable tray elbow

AI Overview

A trapezoidal cable tray elbow typically costs between \$20 and \$150 per piece, depending on material, size, and coating.

Price Factors

The cost of a trapezoidal cable tray elbow depends on several key factors:

- **Material:** Steel is the most common and affordable, while aluminum, stainless steel, and fiberglass-reinforced plastic (FRP) are more expensive due to corrosion resistance and durability requirements .
- **Coating:** Hot-dip galvanized (HDG) or powder-coated elbows cost more than pre-galvanized or uncoated steel due to enhanced corrosion protection .
- **Size and Angle:** Larger elbows or those with sharper bends (e.g., 90° vs 45°) require more material and manufacturing effort, increasing the price .
- **Supplier and Quantity:** Bulk orders or project-based procurement can reduce per-piece costs, while single-piece purchases are typically higher .

Typical Price Ranges

- **Steel elbows:** \$20-\$60 per piece for standard sizes and coatings .
- **Aluminum elbows:** \$40-\$100 per piece due to lightweight and corrosion resistance .
- **Stainless steel elbows:** \$80-\$150 per piece, often used in harsh or hygienic environments
