

Installation of cable trays on the ground in Gabon

AI Overview

Cable tray installation in Gabon follows a structured process involving planning, material verification, support installation, cable laying, grounding, and inspection to ensure safety and compliance.

Planning and Preparation

Before installation, review the approved shop drawings to determine tray layout, length, and location within the building or facility . Conduct a site inspection to ensure the workspace is safe, accessible, and free from obstructions . Confirm that all required tools, lifting equipment, and manpower are available, and conduct a safety briefing for the installation team .

Material Handling and Inspection

All cable trays, ladders, and accessories must be inspected upon delivery for damage, coating integrity, and compliance with approved material submittals . Damaged or non-conforming materials should be reported and removed from the site. Store trays horizontally on a flat surface with timber supports at intervals of one meter, protecting them from moisture and sunlight .

Support and Mounting

Install supports, brackets, and hangers according to manufacturer recommendation...
