

Intelligent QSFP optical modules for campus networks

AI Overview

Intelligent QSFP optical modules provide high-speed, high-density connectivity with real-time monitoring, making them ideal for modern campus networks.

Overview of QSFP Modules

QSFP (Quad Small Form-factor Pluggable) modules are hot-pluggable transceivers that combine four independent electrical channels into a single compact form factor, enabling scalable bandwidth from 40 Gbps to 400 Gbps and beyond . They support multiple protocols including Ethernet, InfiniBand, and Fibre Channel, making them versatile for campus, enterprise, and data center networks . QSFP modules have evolved through generations:

- QSFP+: 40 Gbps (4×10 Gbps channels)
- QSFP28: 100 Gbps (4×25 Gbps channels)
- QSFP-DD: 400 Gbps (8 electrical lanes, double density)

Intelligent Features

Modern QSFP modules integrate Digital Diagnostic Monitoring (DDM), which provides real-time monitoring of critical parameters such as temperature, voltage, optical power, and signal integrity . This intelligence allows network administrators to:

- Detect potential failures proactively...
