

IoT Cable Relay Stand Remote Monitoring Distributor

Overview

Create the Internet of Things with safe, reliable power control. Universal control voltage 3-60VDC or 12-120VAC connects to Arduino, Raspberry Pi, PIC or other micro. ControlByWeb® cellular-enabled edge controllers expand your I/O capabilities with an embedded cellular modem. Connect your device using one of our cellular data plans and utilize expansion modules to bridge the I/O gap. The X-410™ is a versatile industrial I/O controller with four relays, four. This device is an Ethernet and Web enabled input module suitable for home automation, environment monitoring applications, logging/counting different events and many others. SmartDEN IP-32IN provides 16 digital inputs (for motion detector sensors, dry contacts, switches, buttons), 8 analog inputs. Price range: \$319. 95 This product has multiple variants. manufactures and markets the world's broadest range of electrical and electronic products, systems and services. Technologies range from circuit protection and energy management. Field I/O (or distributed I/O) can greatly improve system efficiency and reduce wiring costs where end devices are located at a distance, which result in easier installations and faster troubleshooting. 3V to 48VDC or even 120VAC circuits.

Remote I/O Modules for Stand Alone Data Acquisition and IO

This section offers complete stand-alone data acquisition modules broadly used in industrial applications, such as facility & environmental monitoring, industrial process control, and more.

Aug 23, 2025

Electronic Components Distributor

Electronic components distributor with a huge selection in stock and ready to ship with no minimum orders. New electronic parts added daily.
