

Ireland Fiber Retardant Tubing

AI Overview

Fiber retardant tubing in Ireland is available from multiple suppliers, including composite, PVC, and halogen-free flame-retardant options for industrial, electrical, and specialized applications.

Suppliers and Product Types

1. Shannonvale Fibre Tubes Ltd (Clonakilty, Co. Cork) Shannonvale specializes in carbon fiber and glass composite tubes, offering convolute wound parallel tubes, tapered tubes, and small-diameter “straw tubes” from 3.18 mm internal diameter. Tubes can reach up to 4 meters in length. They produce hybrid glass/carbon fiber tubes with epoxy, silicone, or phenolic resin systems, suitable for electrical, radio communications, cryogenic, and sporting goods applications. They also provide finishing services including grinding, machining, assembly, and painting . 2. Teastech, Ireland Teastech offers flame-retardant foams and tapes such as NORSEAL 2521 and KOREL K40/K60, which are used in gasketing, cushioning, thermal insulation, and vibration dampening. While primarily foam-based, these products are relevant for applications requiring fire-resistant sealing and insulation in conjunction with tubing . 3. Demesne – Iboco PVC Flexible Conduit For electrical and industrial wiring, Iboco PVC flexible conduit is a flame-retardant, self-extinguishing PVC tubing. It is highly flexible, impact-resistant, and resistant to UV, oils, and chemicals, making it ideal for control panels, machinery, HVAC systems, and industrial installations. Metal flexible conduits are also available for high-strength applications . 4. RCC Ireland RCC Ireland stocks halogen-free, flame-retardant tubes, suitable for applications where low smoke and fire safety are critical. These tubes are commonly used in electrical and industrial environments
