

Latest Distribution Box Configuration Table in Mozambique

AI Overview

Mozambique's distribution boxes are designed for 220V/50Hz systems, with rated voltages of 220V single-phase or 380V three-phase, short-circuit withstand $\geq 50\text{kA}$, IP54/IP65 protection, and integrated intelligent monitoring for renewable energy integration.

Key Technical Specifications

- Rated Voltage: 220V (single-phase) / 380V (three-phase) to match Mozambique's standard 220V/50Hz grid .
- Short-Circuit Withstand Current: $\geq 50\text{kA}$, adjustable depending on project capacity .
- Protection Level: IP54 for indoor installations and IP65 for outdoor environments, ensuring resistance to dust and rain .
- Intelligent Monitoring: Real-time monitoring of current, voltage, and power factor, with remote data transmission capabilities (e.g., Modbus protocol) to support dynamic grid management .

Renewable Energy Compatibility

- Photovoltaic Grid Connection: Equipped with MPPT (Maximum Power Point Tracking) interfaces to convert DC input from solar panels to AC output .
- Wind Power Integration: Includes surge suppressors and frequency converters to handle voltage fluctuations from wind energy sources
