

Latest Price List for Armored Logging Fiber Optic Cables

AI Overview

Armored fiber optic cable typically costs between \$0.50 and \$6 per foot, depending on fiber count, construction, and installation requirements.

Material Costs

The base price of armored fiber optic cable varies widely based on fiber type, strand count, and protective construction. Single-mode armored cables generally cost \$0.50 to \$5 per foot, while high-count multimode armored cables can reach \$6 per foot or more for specialized applications . Armored cables are designed for harsh environments, including direct burial or areas with potential rodent damage, which increases material costs compared to unarmored equivalents .

Installation and Labor

Armored cables are heavier and less flexible, making installation more labor-intensive. Installation labor can be 2–3 times higher than for unarmored cables due to handling, routing, and splicing complexity . For example, a 5,000-foot outdoor armored run may have material costs around \$1 per foot, but total project costs including labor, permits, and delivery can reach \$11,000–\$14,500 .

Total Landed Cost

When sourcing armored fiber optic cable internationally, the total landed cost inclu...
