

Latest Price List for Direct-Buried Well Logging Optical Cables

AI Overview

Direct-buried fiber optic cables typically cost between \$0.60 and \$3.50 per foot, depending on type, installation, and environmental factors.

Pricing Overview

The cost of direct-buried fiber optic cable varies based on several factors, including whether the cable is single-mode or multimode, the length of the run, and the complexity of installation . For standard outdoor direct-burial applications, prices generally range from \$0.60 to \$3.50 per foot, with longer runs often reducing the per-foot cost due to fixed setup efforts . For project planning, a typical budget for several hundred to several thousand feet of cable can range from \$1,000 to \$30,000+, depending on specifications and labor requirements .

Factors Affecting Cost

- **Cable Type:** Single-mode fiber is more expensive than multimode due to higher performance and longer-distance capabilities .
- **Environmental Durability:** Direct-buried cables are designed to resist moisture, temperature fluctuations, UV radiation, abrasion, and physical damage, which can increase cost . Armored cables provide additional protection against rodents and crushing, eliminating the need for conduit .
- **Installation Method:** Costs increase for trenching, deep burial, or challenging terrain. Labor time, splicing, testing, and local permitting also contribute to total ex...
