

Latest Price List for Outdoor Optical Cable Splicing

At Overview

Outdoor fiber optic splicing typically costs \$50-\$150 per fusion splice, with additional costs for closures, trays, and installation depending on fiber count and site conditions.

Splicing Labor Costs

- Fusion splicing is the standard method for outdoor fiber connections, with labor costs ranging from \$50 to \$150 per splice point depending on project size, fiber type, and site conditions .
- Volume discounts are common: larger projects with high fiber counts can reduce the per-splice rate significantly.
- Site conditions affect cost: aerial splicing in open areas is cheaper than underground vault work requiring traffic control or confined space entry .
- Testing and documentation (OTDR verification) may be included or billed separately at \$75-\$150/hour .

Outdoor Splice Closures and Enclosures

- Fiber Dome Closures: IP67-rated, weather-resistant, capacities of 24, 48, or 96 single-fusion splices, suitable for aerial, duct, or buried applications .
- Starfighter™ and Optima™ Series: Hermetically sealed, gasketed end plates, integrated slack storage, support inline and butt configurations, designed for fast installation and maintenance
