

# Level 1 Rainproof Distribution Box Protection

## AI Overview

Level 1 rainproof distribution boxes are designed to meet IP65 standards, providing protection against water jets and rain while safeguarding internal electrical components.

### Understanding Level 1 Rainproof Protection

A Level 1 rainproof distribution box typically corresponds to an IP65 rating, which ensures the enclosure is dust-tight and protected against low-pressure water jets from any direction . This level of protection is suitable for outdoor installations, industrial sites, and areas exposed to rain, preventing water ingress that could cause short circuits, corrosion, or equipment failure .

### Key Features

- **Sealing Mechanisms:** High-grade polyurethane or elastomeric gaskets are used around the lid and access points to maintain a continuous barrier against water . Compression latches or heavy-duty stainless steel fasteners ensure uniform pressure across the sealing perimeter, preventing distortion over time .
- **Materials:** Common materials include ABS, polycarbonate, or marine-grade stainless steel, which resist UV degradation, corrosion, and mechanical stress .
- **Internal Mounting:** DIN rails, terminal blocks, and circuit breakers are mounted on galvanized steel or reinforced fiberglass plates, often with molded pillars to prevent condensation contact with the back wall ....
