

Low Noise Certification for Telecom Chassis

Overview

This European Telecommunication Standard (ETS) specifies acoustic noise emission limits for equipment used in telecommunication locations as specified in the ETS 300 019-1 series. This ETS covers switching, transmission, power, supervisory, as well as tariff and billing equipment. Based on years of experience in the field of testing and certification and a large number of tests on related products on the market, TÜV Rheinland has set strict standards for hearing health and noise reduction capabilities to help everyone maintain good hearing and stay away from noise. We help you determine. (a) In order to carry out its responsibilities under the Communications Act and the various treaties and international regulations, and in order to promote efficient use of the radio spectrum, the Commission has developed technical standards and other requirements for radio frequency equipment and. TIA is accredited by the American National Standards Institute (ANSI) as a standards developing organization (SDO).
