

Maldives to India Long-Distance Optical Cable

AI Overview

The Maldives is being connected to India via high-capacity submarine optical cables, notably the India-Asia-Xpress (IAX) system, providing multi-terabit connectivity and linking the region to major global internet hubs.

India-Asia-Xpress (IAX) Cable

The IAX submarine cable system, led by Reliance Jio in collaboration with Ocean Connect Maldives, directly connects the Maldives to India and extends to Singapore, with additional landings in India, Malaysia, and Thailand . The system spans approximately 16,000 kilometers and is designed to deliver over 200 terabytes per second at speeds of 100 Gb/s, making it one of the highest-capacity links in the region . The cable originates in Mumbai, India, and is strategically routed to support multiple Indian landing points, enhancing redundancy and network resilience . The IAX system is expected to be operational by the end of 2026 .

Dhivaru Subsea Cable Initiative

In addition to IAX, Google's Dhivaru cable system will connect the Maldives with Christmas Island and Oman, further strengthening digital connectivity across the Indian Ocean . This project also includes the development of connectivity hubs in the Maldives and Christmas Island, aimed at improving regional internet reliability, supporting AI-driven services, and enabling the Maldives to become a strategic digital hub . The Dhivaru cable complements existing infrastructure and positions the Mald...
