

OPGW Optical Cable Price List

AI Overview

The cost of OPGW cables ranges from approximately \$600–\$1,200 per kilometer, depending on fiber count, metallic composition, and installation requirements.

Base Pricing

For standard utility-grade OPGW cables with 36–48 fibers, prices typically range from \$0.99–\$2.50 per meter or \$600–\$800 per kilometer for aluminum tube designs, with bulk orders (≥ 5 km) reducing unit costs by 18–25% . Higher fiber counts, such as 72-core or 96–144-core cables, can increase costs to \$850–\$1,200 per kilometer, especially for stainless steel or aluminum-clad steel variants . In Chinese markets, prices for 24-core cables are around RMB 15,000/km, while 72-core cables may reach RMB 30,000/km, reflecting material and structural specifications .

Key Cost Drivers

- **Fiber Count and Type:** More fibers increase both material and manufacturing costs. High-bandwidth applications or grid modernization projects often require ≥ 72 cores .
- **Metallic Composition:** Aluminum is standard, but aluminum-clad steel or stainless steel options are more expensive due to higher mechanical strength and corrosion resistance .
- **Mechanical Strength and Environmental Protection:** Special coatings, corrosion treatments, and lightning tolerance add to the cost .
- **Installation Complexity:** Long spans, live-line stringing, or helicopter-assisted installation increase labor and equipment costs .
- **Logistics and Local Charges:** Transportation, import duties, VAT, and local taxes can significantly affect the final delivered cost
