

Oman 905nm Laser Diode Origin

AI Overview

905nm laser diodes are primarily manufactured by international companies such as LASER COMPONENTS (Canada), ROHM (Japan), and OSI Laser Diode (USA), with no confirmed local production in Oman.

Global Manufacturers and Technology

905nm laser diodes are semiconductor devices that emit near-infrared light at 905 nanometers, widely used in LiDAR, range finding, speed monitoring, and industrial sensing applications . Key manufacturers include:

- LASER COMPONENTS (Canada): Produces high-power pulsed laser diodes with AlGaAs structures, offering high reliability, temperature stability, and peak powers up to 650 W in stacked configurations .
- ROHM (Japan): Offers high-power 905nm diodes like the RLD90QZW5, optimized for long detection distances, low wavelength fluctuation, and energy efficiency, commonly used in robotics and LiDAR systems .
- OSI Laser Diode (USA): Manufactures advanced 905nm pulsed diodes with integrated micro-lenses for telecommunications, industrial, aerospace, and medical applications .

Distribution and Access

In Oman, 905nm laser diodes are likely imported through distributors or electronics suppliers rather than locally manufactured. Companies like Mouser Electronics provide global shipping of 905nm diodes, including datasheets and technical support...
