

Optical cable in the same trench as the duct

Overview

Q4: Can fiber optic cable be buried in the same trench as electrical power lines?

A: Yes, because fiber optic cable is non-conductive (dielectric), it is immune to electromagnetic interference (EMI). Underground cables are pulled in conduit that is buried underground, usually 1-1.2 meters (3-4 feet) deep to reduce the likelihood of accidentally being dug up. The charter of the FOA was to promote professionalism in fiber optics through education, certification, and. 1. Innerduct provides a good way to identify fiber optic cable and protect it from damage, generally a result of someone cutting it by mistake! You can get the innerduct with pulling tape already installed. The Direct buried cable placing methods described in this document are intended as guidelines. Advantages Ease of maintenance: Damaged cables can.
