

Ordering Metal Trapezoidal Cable Trays

AI Overview

Metal trapezoidal cable trays are available in galvanized steel, stainless steel, and aluminum, with a variety of sizes, accessories, and standards-compliant options for industrial and commercial installations.

Types and Materials

Metal trapezoidal cable trays are typically made from hot-dip galvanized steel, stainless steel, or aluminum, providing durability, corrosion resistance, and suitability for indoor or outdoor environments . Stainless steel (grade 316L) is ideal for corrosive or marine environments, while galvanized steel is cost-effective for general industrial use . Aluminum trays are lightweight and suitable for installations where weight reduction is important .

Standards and Compliance

When ordering, ensure the trays comply with DIN EN 61537 or BS EN 61537, which cover cable tray and ladder systems for safe and flexible cable routing . Compliance ensures proper load-bearing capacity, ventilation, and accessibility for maintenance or future expansion.

Sizes and Load Capacity

Trapezoidal cable trays come in various widths (50mm to 900mm) and depths (12mm to 50mm) to accommodate different cable loads . Slot patterns in the tray allow for easy attachment of cable ties, tubing clamps, and other accessories, while return fl...
