

PDU Fiber Optic Rack IP67 Franchise

AI Overview

Fiber optic rack PDUs are available in modular, intelligent, and basic configurations, with some manufacturers offering distributor and franchise support, though IP67-rated options are specialized and may require custom solutions.

Overview of Fiber Rack PDUs

Fiber optic racks require reliable power distribution units (PDUs) to manage energy efficiently while protecting sensitive networking equipment. PDUs for these racks are designed to support server racks, wallmount racks, and LAN cabinets in data centers, offices, and universities. They come in modular designs, allowing customization of outlet types, cable lengths, and mounting styles (horizontal 1U or vertical) to suit specific rack configurations (Olabs Fiber Solutions - FiberFlex™) .

Key Features

- **Outlet Variety:** PDUs can include C13, C15, C19, and C21 outlets, supporting high-density deployments and flexible connectivity (APC NetShelter 9K series) .
- **Intelligent Monitoring:** Advanced PDUs offer switched or metered models for remote monitoring, energy optimization, and circuit protection, enhancing operational efficiency (Gcabling® PDU) .
- **Rotating and Modular Design:** Some PDUs feature 360° rotation nodes for easier cable management, reducing tangling and stress on cables, which is critical in fiber optic environments .
- **Compliance and Safety:** Many PDUs meet LVD, CE, and RoHS standards, ensuring safety and regulatory compliance for global deployments
