

Palau Solar Cable Tray Prices

AI Overview

Solar cable trays in Palau typically range from \$20 to \$150 per meter, depending on material, type, and installation requirements.

Cost Factors

- Material
 - Hot-dip galvanized (HDG) steel: Most cost-effective for outdoor solar installations, durable, corrosion-resistant, and suitable for long-term use. Prices generally range from \$20 to \$50 per meter for standard ladder or perforated trays .
 - Aluminum: Lightweight and corrosion-resistant, ideal for rooftop or elevated installations. Costs are higher, typically \$40 to \$80 per meter .
 - Stainless steel (304 or 316): Used in highly corrosive or coastal environments. Initial cost is high, around \$80 to \$150 per meter, but offers minimal maintenance and long lifespan .
- Tray Type
 - Ladder trays: Common for solar farms; open design allows ventilation and reduces heat buildup. Cost-effective for long spans.
 - Perforated trays: Provide moderate ventilation and cable support; slightly higher cost than ladder trays.
 - Solid-bottom trays: Offer maximum protection from dust, debris, or liquids; less common outdoors and more expensive.
- Size and Accessories
 - Width, height, and thickness affect pricing. Standard widths range from 50mm to 600mm, heights from 20mm to 150mm, and thickness from 1mm to 4mm
