

Price of Double-Layer Independent Cable Trays

AI Overview

The price of double-layer independent cable trays varies widely depending on material, size, and supplier, typically ranging from \$50 to \$200 per meter for standard industrial-grade trays.

Factors Affecting Price

- **Material:** Cable trays can be made from galvanized steel, stainless steel, aluminum, or fiberglass-reinforced plastic (FRP). FRP trays are more expensive due to corrosion resistance and electrical non-conductivity, while aluminum is lighter and easier to install but may cost more than standard steel .
- **Tray Type and Configuration:** Double-layer independent trays, which allow separate routing of power and data cables, are more complex than single-layer trays. This increases manufacturing and installation costs .
- **Size and Load Capacity:** Wider trays or those designed to carry heavier cable bundles require stronger materials and thicker construction, which raises the price .
- **Finish and Coating:** Hot-dip galvanized trays are common for corrosion protection and are moderately priced, while stainless steel or powder-coated trays are more expensive .
- **Supplier and Region:** Prices vary by supplier and location. Online suppliers like Alibaba, RS Hong Kong, and Bahra Electric offer a range of options, but bulk orders or custom dimensions may affect cost .
