

Price of FRP Cable Trays for Tunnels

AI Overview

FRP cable trays for tunnels typically range from \$30 to \$150 per meter, depending on size, material, and customization.

Overview of FRP Cable Trays

FRP (Fiberglass Reinforced Plastic) cable trays are widely used in tunnels due to their corrosion resistance, lightweight structure, electrical insulation, and durability in harsh environments . They are available in various forms, including ladder trays, trough trays (solid or perforated), and channel trays, allowing flexibility for different cable routing needs . FRP trays are non-conductive, resistant to chemicals, and suitable for high-humidity or underground conditions .

Factors Affecting Price

- Tray Dimensions: Wider and deeper trays require more FRP material, increasing the cost per meter .
- Material Thickness: Thicker walls or rungs enhance load capacity but raise the price .
- Resin Type: Different resins provide chemical resistance, fire retardancy, or UV protection, affecting cost .
- Customization: Tunnels often require custom lengths, load capacities, and mounting options, which can increase the price .
- Supplier and Manufacturing Quality: Prices vary by manufacturer, production standards, and certifications such as ISO 9001 or fire-retardant compliance .

Typical Price Range...
