

Price of Optical Cable Fixing Plate

AI Overview

Optical cable fixing plates typically range from \$5 to \$30 per unit, depending on type, brand, and mounting compatibility.

Overview of Products and Pricing

Optical cable fixing plates are used to secure and relieve strain on fiber optic or control cables in network cabinets or control panels. Prices vary based on material, size, and mounting type:

- Basic network cabinet or fiber optic plates (like those on Amazon) generally cost around \$5-\$15 per piece for standard units suitable for home or small office installations .
- Industrial-grade or specialized plates (such as the Optotec CODC closures or Murrplastik KAF type) designed for railway or high-safety applications can range from \$15-\$30 or more per unit, reflecting certifications and durability standards .
- Bulk or wholesale purchases may reduce the per-unit cost, especially for standard fixing plates used in factories or large-scale installations .

Factors Affecting Price

- Material and Build Quality: Plates made from high-grade plastics or metals with fire-retardant properties cost more.
- Mounting Compatibility: Snap-in designs for 35 mm top-hat rails or C-rails may be slightly more expensive due to ease of installation .
- Certifications: Products approved for railway technology or industrial safety standards (EN 45545-2, NFPA 130) carry higher prices....
