

Price of Optical Cable Reeling Machine

AI Overview

The price of a simple optical cable reeling machine typically ranges from \$200 to \$1,500 depending on type, capacity, and features.

Price Range and Examples

- Manual or spring-driven reeling machines: These compact, portable machines suitable for workshops or light-duty cable handling generally cost \$200-\$500. They operate without external power and are ideal for small-scale optical cable deployment .
- Electric motorized reeling machines: Designed for automated cable deployment and retrieval, these machines are more robust and suitable for medium-duty industrial use. Prices typically range from \$800-\$1,500 .
- Heavy-duty or custom industrial machines: For large-scale cable deployment in mining, offshore, or manufacturing environments, prices can exceed \$2,000, especially for machines with hydraulic or pneumatic drive systems and advanced tension control .

Factors Affecting Price

- Operation type: Manual, semi-automatic, or fully electric/motorized. Manual machines are cheaper, while motorized units cost more due to automation and higher torque.
- Capacity and drum size: Larger reels or higher cable capacity increase the cost.
- Material and build quality: Machines built for outdoor or hazardous environments (oil, chemical, or marine applications) are more expensive due to corrosion-resistant materials and safety features....
