

Price of cable trays on top of server racks

AI Overview

Cable trays for server racks typically range from \$20 to \$200 or more, depending on size, type, and material.

Typical Price Ranges

- Small side or channel-type cable trays (1U, 24-port, ABS plastic) are generally \$20-\$50 per tray, suitable for light network cabling and side-mount installation in standard 19-inch racks (COBTEL LXJ-100 series) .
- Medium-sized transition trays (2U, adjustable width, metal construction) designed for copper or fiber cables usually cost \$50-\$100 . These provide proper bend radius control and tool-less installation.
- Large overhead or top cable troughs for 30-32" wide enclosures can range from \$100-\$200, offering robust support for heavier cabling and integration with existing enclosures without infrastructure changes .

Factors Affecting Price

- Material: Plastic trays are cheaper, while steel or aluminum trays are more durable and expensive.
- Size and Capacity: Wider or deeper trays that hold more cables cost more.
- Mounting Type: Side-mounted, vertical, or overhead trays have different installation requirements and pricing.
- Brand and Certification: Premium brands like Rittal, APC, or Eaton may charge more for certified or specialized trays .
