

Price of connecting a construction site socket to a distribution box

Overview

Prices vary based on the type of power panel, power size, and duration. The national average cost ranges from \$1,000 to \$4,000, with most people paying around \$2,000 to install an overhead metered temporary. This box allows you to safely and efficiently distribute power downstream of your power source. It includes GFCI protection on all 20A 120V receptacles. The unmetered surface mount is factory-assembled and factory-tested. It comes to the construction job site ready to use with no need to assemble. Submit requests for new construction or remodeling projects that require you to install, upgrade, relocate, or modify electrical loads, equipment, or meters. For more information or to get started, select your project type below.

Residential projects including single family homes, accessory. Power Distribution Box Temporary Distribution Box, It has Both 50A and 30A inlets, six 120V CFGI duplexes, Safe and Reliable Power on Any Construction site (50A) The temporary socket distribution box is equipped with ETL-certified L6-30R sockets and L14-30R sockets on one side, and there are also. The Suggested Retail price column, also referred to in the industry as the third column, end column or best column are the manufactures' most current published prices.
